

"Night and Day" Block of the Month

Bring to the NOVEMBER Meeting

This makes a 12" paper pieced block. Use the 1" test square on the template as a guide when photocopying. Or, copy the template any size you like.

Make as many templates as you think you will need all at once, *on the same photocopier or scanner*. Different machines may size copies a little differently.

You will need four copies of the template to make one block. Copying onto light weight paper is preferred. Regular printer paper was used for the sample.

Select two contrasting colors for the best effect. There is a little more waste when paper piecing than with regular piecing. Keep that in mind if you select a fabric you have a limited supply of.

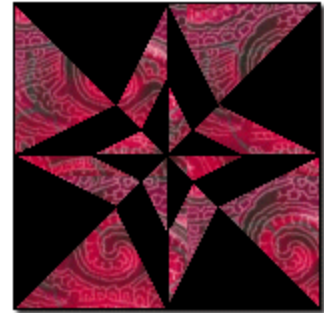

If you require instructions on *how to paper piece*, I have provided Internet links:

<http://www.stitchersneedle.com/article1009.html>

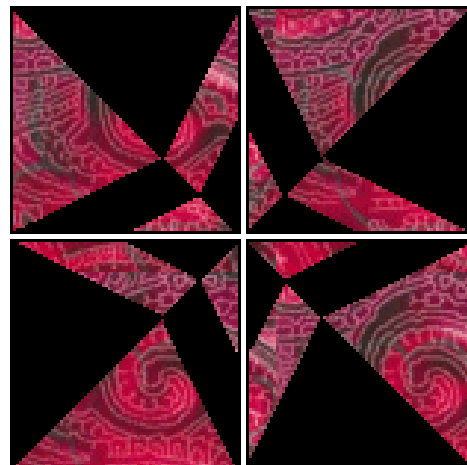

<http://www.winnowing.com/ppp.html>

<http://www.quilterscache.com/StartQuiltingPages/startquiltingthree.html>

Once your templates are paper pieced, sew the pieces together to form a quadrant as shown on the left below. Then join the four quadrants together to make one block.

*This group is
ONE template*

*This group is
FOUR templates*
